

## Suggested Therapeutic Alternatives from the National Formulary

Chambers Plan Health options cover drugs on the TELUS National Formulary. Although the National Formulary covers many of the most frequently prescribed drugs, it does not cover them all. While non-formulary drugs are covered at a lower percentage or not covered at all, there may be possible therapeutic alternatives that are included on the formulary.

A possible therapeutic alternative is not indicative of interchangeability. The decision about what drugs are prescribed is between **you and your doctor**.

By discussing your plan with your doctor, a drug therapy may be prescribed, when appropriate, which is an eligible expense on the formulary. Doctors who want additional information can call TELUS Health Solutions toll-free at 1.888.668.1330.

**The table on the following pages lists the most commonly prescribed non-formulary drugs and suggests possible alternatives that are included on the formulary.**

**Chambers Plan**
